PROFILE SUMMARY

A dedicated and skilled .NET Developer with a Bachelor's degree in Computer Science from Gomal University. Experienced in developing dynamic and user-friendly applications, with strong expertise in C/C++, C#, ASP.NET MVC, HTML, CSS, Bootstrap, AJAX, and MS SQL. Successfully completed multiple university projects, including Medical Laboratory System, School Management System, Libraray management system, Pharmacy Management System, e-commerce website, and CV Builder. Known for a meticulous approach to coding, a commitment to delivering high-quality results, and the ability to contribute effectively to any development team.

PROJECTS

Pharmacy Management System

- Developed a C# Windows Forms desktop app for managing customers, distributors, manufacturers, medicines, purchases, returns, sales, and stock.
- Integrated Crystal Reports for detailed reporting and enhanced operational efficiency.

Medical Laboratory System

- Developed a robust system using ASP.NET MVC with four admin roles: Master Admin (full access), Test Conductor (test management), Result Generator (result processing), and Report Generator (report creation).
- Integrated Crystal Reports for detailed test report generation.
- Enabled patients to view their test results online by entering their invoice number.

FINAL YEAR PROJECT

ONLINE SHOP

- Developed a comprehensive e-commerce website featuring user authentication, product search by category/brand/subcategory, and user functionalities such as cart, wishlist, Checkout and profile management.
- Implemented admin functionalities for managing categories, SubCategory, brands, Color, Size, products, order details, and customer orders.
- Utilized HTML, CSS, Bootstrap, AJAX, and MVC .NET ASP for front-end and back-end development, with MS SQL for database integration.
- Focused on developing the user interface for browsing products, adding items to the cart and wishlist, and the checkout process.
