UMAIR KHAN

Full Stack .NET Developer

Islamabad, Pakistan | +92 331 3555610 | umairbscs145@gmail.com

LinkedIn: linkedin.com/in/umair-khan05 | Portfolio: umairmehsud05.github.io/UmairPortfolio

PROFESSIONAL SUMMARY

Full Stack .NET Developer with 1+ year of professional experience delivering scalable full -stack web and desktop applications using C#, ASP.NET Core/MVC, WPF, and SQL Server. Hands-on experience developing a Restaurant POS system, integrating enterprise APIs with Clean Architecture and CQRS, and optimizing database query performance in production environments. Known for optimizing database performance and delivering maintainable code within Agile, code-review-driven teams. Seeking to contribute to a collaborative development team.

TECHNICAL SKILLS

Languages: C#, HTML5, CSS3, SQL
Frameworks: ASP.NET Core, ASP.NET MVC, Web API, WPF (MVVM, XAML), Windows Forms, Angular
Data Access: Entity Framework Core, LINQ, ADO.NET, Dapper
Databases: SQL Server - Stored Procedures, Triggers, Indexes, Views, Query Optimization, Database Normalization
APIs: RESTful APIs, Postman, Swagger/OpenAPI, Third-party API Integration
Architecture: MVC, N-Tier, Repository Pattern, CQRS, Clean Architecture, Dependency Injection, OOP, SOLID Principles
Reporting: Crystal Reports, iTextSharp, PDF/Excel Automation
Security: ASP.NET Identity, JWT Authentication, BCrypt Hashing
Tools & IDEs: Git, GitHub, Visual Studio 2022, SSMS, VS Code

PROFESSIONAL EXPERIENCE

Full Stack .NET Developer - **Fidsor** *January 2026 - Present*

Islamabad, Pakistan

- Engineered a Restaurant POS system using WPF (MVVM, XAML), C#, SQL Server, and Entity Framework Core, supporting 500+ daily transactions with real-time order management and kitchen display integration.
- Architected the database schema across running orders, sales tracking, and kitchen operations tables using SQL Server normalization, achieving zero data consistency issues through ACID-compliant transaction management.
- Implemented modify-order workflows in WPF with complex state management between the XAML frontend and SQL Server backend, ensuring reliable updates under concurrent usage.
- Optimized stored procedures and SQL queries for POS transaction processing, reducing report generation time by 30% and improving overall application response speed.
- Debugged and resolved race conditions in concurrent order modifications, preventing data corruption during peak hours and ensuring 99.9% transaction integrity across all active sessions.
- Collaborated with senior developers through Git pull requests, code reviews, and Agile sprint planning, consistently delivering production-ready code each sprint cycle.

.NET Developer- **Dynamics 360** *September 2025 - December 2025*

Islamabad, Pakistan

- Integrated Cizaro API with Microsoft Dynamics 365 Business Central using ASP.NET Core, enabling accurate cross-platform data synchronization and eliminating manual data transfer between systems.
- Developed RESTful APIs using Clean Architecture, Mediator Pattern, and AutoMapper, producing a modular, maintainable backend with clear separation of concerns and Dependency Injection.
- Implemented CQRS pattern with MediatR request/response handlers, improving business logic organization and reducing debugging time across complex data workflows.
- Configured ASP.NET Identity with JWT authentication and role-based authorization, securing all API endpoints with token-based access control.

- Documented 15+ API endpoints using Swagger/OpenAPI and performed end-to-end testing in Postman, reducing integration errors by 25% during third-party system handoffs.
- Participated in Agile sprint cycles using GitHub pull requests and code reviews, delivering review-ready contributions consistently within two-week sprint deadlines.

PROJECTS

TestSphere - Online Examination Platform | *ASP.NET MVC, Entity Framework, LINQ, SQL Server*

GitHub: TestSphere

- Built a role-based examination system supporting Admin, Teacher, and Student roles serving 200+ users, using ASP.NET MVC, Entity Framework, and LINQ.
- Designed a timed exam interface with auto-save functionality, reducing submission errors by 40% through reliable state persistence.
- Developed an analytics dashboard tracking 10+ KPIs including student performance, subject metrics, and result trends.
- Automated management of 100+ exam questions with bulk handling, eliminating manual entry errors and saving administrative hours weekly.

SmartStock - Inventory and Sales Desktop Application | *C#, WinForm, SQL Server, Crystal Reports*

GitHub: SmartStock

- Built a real-time inventory and sales tracking desktop application using C#, WinForm, and SQL Server targeting small-to-medium businesses.
- Implemented secure BCrypt authentication and automated PDF/Excel report generation, reducing manual reporting time by 80%.

Online Shop - E-Commerce Platform | *ASP.NET MVC, AJAX, SQL Server, Stored Procedures*

GitHub: Online Shop

- Built a full-featured e-commerce platform with ASP.NET MVC and AJAX supporting authentication, cart, checkout, wishlist, and order tracking.
- Optimized database queries using stored procedures and indexing, achieving 35% faster execution time and improved scalability.
- Designed an admin dashboard for managing products, categories, brands, and orders, increasing operational efficiency by 50%.

Medical Laboratory Management System | *ASP.NET MVC, SQL Server, Crystal Reports*

GitHub: Medical Lab

- Developed a multi-role lab management system covering Master Admin, Test Conductor, Result Generator, and Report Printer workflows.
- Integrated Crystal Reports for automated test result delivery, improving reporting speed by 60% compared to manual generation.
- Managed a dynamic test catalog of 200+ entries for doctors and staff, improving data accuracy and lab operational efficiency.

EDUCATION

Bachelor of Science in Computer Science *Graduated: 2024*

Gomal University, D.I. Khan | **CGPA: 3.95 / 4.00**

LANGUAGES

English (Professional Working Proficiency) | **Urdu** (Native)
